

Integrated committee management and effective meeting management tools safeguard the methodological standards in the day-to-day rhythm of work and create a sound information basis. This increases efficiency and fosters decision-making ability, ultimately maximizing your organization's strength of execution.

Our committee module enables you not only to shape and empower your strategic management office effectively, but also to map the entire committee landscape of your organization. In the committee tool, all committees are recorded in accordance with a universal methodological standard, and the tasks, competencies, and responsibilities are described. From the committee module you have access to the meeting tool, where you can organize and document all committee meetings. To-dos and important decisions are recorded in such a way that they are listed in summary form in both the committee tool and in individual overviews for separate users. The module also connects with the project tool.

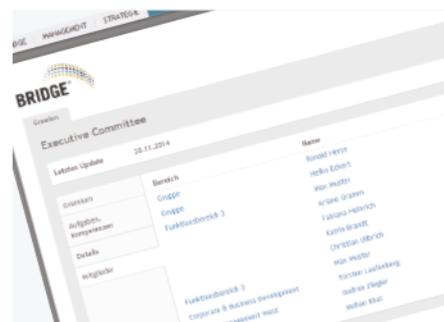

"It's amazing what synergies became possible once we used BRIDGE® to methodologically streamline the global committee landscape and arrange it in a prescribed order."

## SERVICES

Our experts support you in developing an acceptable standard for consistently recording committees and meetings. Our Management Services Team helps you with the initial recording of all the committees, and then with the transfer to the platform.

---

“We map all committees and meetings with BRIDGE® so that we have an end-to-end standard and don’t have to put up with inefficiencies when we store files and make changes.”
